STAT
To:

[REDACTED]

Attached are copies of the GSA documents on cutting off hot water in Federal buildings. I thought there had been an employee bulletin, but apparently not. As you can see, CIA had no voice in the matter. I've mentioned this at my staff meeting, so the word should get around, but the MFG can help spread the explanation.

The Applications Career Guide should be published in a week or 10 days.

Admin Staffs is circulating in Admin, but [REDACTED] will send you a copy.

I've asked [REDACTED] to get you a copy of SPS's guide, and Production Division's, too, as soon as it is out,

By now you should have heard from
George about the money and about
the nomination process. I assume
there are no problems.

I'll be very interested in
your success with the video
tapes at Hqs. Pls let me know.

Subject Domestic Hot Water Policy

To All Area and Buildings Managers, NCR

The policy of shutting off domestic hot water serving restrooms was undertaken in June of last year to achieve energy conservation objectives in the National Capital Region.

The results obtained have been very effective and the decision has been made to continue this program indefinitely. The exceptions to these requirements are that domestic hot water may be generated for cafeterias, health units, showers, craft and custodial washrooms, utility sinks, printing plants, and special-purpose laboratories.

If you have any questions concerning this policy, contact the Energy Branch on 755-1547.

JOHN T. MYERS
Assistant Regional Administrator
Public Buildings Service
